SAFETY DATA SHEET
Aviation Jet Fuel JET A-1 (JETA1)

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Product name
Aviation Jet Fuel JET A-1 (JETA1)
Product number
ID 10505
Internal identification
145163

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified uses
Distribution of substance (ES01a) Formulation & (re)packing of substances and mixtures (ES02) Use as a fuel (ES12a, ES12b)
Uses advised against
Consumer Professional use.
Uses in coatings Use in cleaning agents Lubricants Metal working fluids/rolling oils Use as binders and release agents Use in agrochemicals Road and construction applications Explosives manufacture & use

1.3. Details of the supplier of the safety data sheet
Supplier
Neste Oyj
Keilaranta 21, Espoo, P.O.B. 95, FIN-00095 NESTE, FINLAND
Tel. +358 10 45811
SDS@neste.com (chemical safety)

1.4. Emergency telephone number
National emergency telephone
+358-9-471 977, +358-9-4711, Poison Information Centre

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification (EC 1272/2008)
Physical hazards
Flam. Liq. 3 - H226
Health hazards
Skin Irrit. 2 - H315 STOT SE 3 - H336 Asp. Tox. 1 - H304
Environmental hazards
Aquatic Chronic 2 - H411

2.2. Label elements
Hazard pictograms

Signal word
Danger
Hazard statements
H226 Flammable liquid and vapour.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H304 May be fatal if swallowed and enters airways.
H411 Toxic to aquatic life with long lasting effects.
Aviation Jet Fuel JET A-1 (JETA1)

Precautionary statements
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P273 Avoid release to the environment.
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor.
P331 Do NOT induce vomiting.
P261 Avoid breathing vapours.
P280 Wear protective gloves.

Contains
Kerosine (petroleum), sweetened, Distillates (petroleum), hydrotreated light; Kerosine - unspecified, Kerosine (petroleum), hydrodesulfurized, Renewable hydrocarbons (kerosine type fraction)

2.3. Other hazards
Other hazards
Evaporates slowly. May cause eye and respiratory system irritation. Risk of soil and ground water contamination.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Aviation Jet Fuel JET A-1 (JETA1)

### Kerosine (petroleum), sweetened

- **CAS number:** 91770-15-9
- **EC number:** 294-799-5
- **REACH registration number:** 01-2119502385-46-XXXX

**Classification**
- Flam. Liq. 3 - H226
- Skin Irrit. 2 - H315
- STOT SE 3 - H336
- Asp. Tox. 1 - H304
- Aquatic Chronic 2 - H411

### Renewable hydrocarbons (kerosine type fraction)

- **CAS number:** —
- **REACH registration number:** 01-2119850115-46

**Classification**
- Flam. Liq. 3 - H226
- Asp. Tox. 1 - H304

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

**Composition comments**
Mixture of a petroleum product and additives. Total aromatics at maximum: 26.5 %. Naphthalene (CAS 91-20-3) < 1 %. Toluene (CAS 108-88-3) < 1%. Benzene (CAS 71-43-2) < 0.1 %.

### SECTION 4: First aid measures

**4.1. Description of first aid measures**

**Inhalation**
Remove person to fresh air and keep comfortable for breathing. For breathing difficulties, oxygen may be necessary. If breathing stops, provide artificial respiration. Get medical attention if symptoms are severe or persist.

**Ingestion**
Do not induce vomiting. Get medical attention immediately.

**Skin contact**
Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if irritation persists after washing.

**Eye contact**
Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation persists after washing.

**4.2. Most important symptoms and effects, both acute and delayed**

**General information**
Irritating to skin. May irritate eyes. Vapours in high concentrations are narcotic. May cause nausea, headache, dizziness and intoxication. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

**4.3. Indication of any immediate medical attention and special treatment needed**

**Notes for the doctor**
Treat symptomatically.

### SECTION 5: Firefighting measures

**5.1. Extinguishing media**

**Suitable extinguishing media**
Water spray, foam, dry powder or carbon dioxide.

**Unsuitable extinguishing media**
Do not use water jet as an extinguisher, as this will spread the fire.
Aviation Jet Fuel JET A-1 (JETA1)

5.2. Special hazards arising from the substance or mixture

Specific hazards: Flammable liquid and vapour. Containers can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products: Carbon dioxide (CO2). Carbon monoxide (CO).

5.3. Advice for firefighters

Protective actions during firefighting: Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Prevent fire extinguishing water from contaminating surface water or the ground water system.

Special protective equipment for firefighters: Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: Avoid inhalation of vapours and contact with skin and eyes. Wear adequate protective equipment at all operations.

For emergency responders: Prevent unauthorized access. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back. Eliminate all ignition sources if safe to do so. Take precautionary measures against static discharge.

6.2. Environmental precautions

Environmental precautions: Avoid release to the environment. Stop leak if safe to do so. Avoid the spillage or runoff entering drains, sewers or watercourses. Contain spillage with sand, earth or other suitable non-combustible material. Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air). Risk of soil and ground water contamination.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up: Immediately start clean-up of the liquid and contaminated soil. Small Spillages: Absorb spillage with sand or other inert absorbent. Pay attention to the fire and health hazards caused by the product. Take care as floors and other surfaces may become slippery.

6.4. Reference to other sections

Reference to other sections: For personal protection, see Section 8.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions: The product contains volatile substances which may spread in the atmosphere. Avoid heat, flames and other sources of ignition. Take precautionary measures against static discharges. Use only non-sparking tools. Ground/bond container and receiving equipment. All handling should only take place in well-ventilated areas. Avoid inhalation of vapours and contact with skin and eyes. Use personal protective equipment and/or local ventilation when needed. Do not eat, drink or smoke when using this product. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. Wash contaminated clothing before reuse. During tank operations follow special instructions (risk of oxygen displacement and hydrocarbons).

7.2. Conditions for safe storage, including any incompatibilities
Aviation Jet Fuel JET A-1 (JETA1)

Storage precautions
Flammable liquid storage. Vapours may form explosive mixtures with air. Store in accordance with local regulations. Store in a demarcated bunded area to prevent release to drains and/or watercourses. Take precautions against leakage by constructing collecting pools and sewerage systems as well as by surfacing the loading and unloading stations. Only store in correctly labelled containers. Use containers made of the following materials: Carbon steel. Stainless steel. Keep container tightly closed. Protect from sunlight.

7.3. Specific end use(s)
Specific end use(s) Not known.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Occupational exposure limits
Solvent naphtha, group 3: 100mg/m3 (8h), HTP 2018/FIN. The individual limit values can be applied for the hydrocarbons.

Benzene
Benzene: 1 ppm (8h), 3,25 mg/m3, VNa 1267/2019/FIN (binding limit value). May be absorbed through the skin.

naphthalene
Naphthalene: 1 ppm (8h), 5 mg/m3 (8h), 2 ppm (15min), 10mg/m3 (15min), HTP 2018/FIN. Naphthalene: 10 ppm (8h), 50 mg/m3 (8h), EU OELV (EC/1991/322).

toluene
Toluene: 25 ppm (8h), 81 mg/m3 (8h), 100ppm (15min), 380 mg/m3 (15min), HTP 2018/FIN. Toluene: 50 ppm (8h), 192 mg/m3 (8h), 100ppm (15min), 384 mg/m3 (15min), EU OELV (EC/2006/15) May be absorbed through the skin.

PNEC
Not available.

Renewable hydrocarbons (kerosine type fraction)

DNEL
Workers - Dermal; Long term systemic effects: 42 mg/kg/day
Workers - Inhalation; Long term systemic effects: 147 mg/m³

Category: Kerosines

DNEL
Consumer - Oral; Long term systemic effects: 18,75 mg/kg bw/day

8.2. Exposure controls

Appropriate engineering controls
All handling should only take place in well-ventilated areas. Use personal protective equipment and/or local ventilation when needed. Handle in accordance with good industrial hygiene and safety practice. During tank operations follow special instructions (risk of oxygen displacement and hydrocarbons).

Eye/face protection
Tight-fitting safety glasses.

Hand protection
Wear protective gloves. It is recommended that gloves are made of the following material: Nitrile rubber. Neoprene. Polyvinyl chloride (PVC). The selected gloves should have a breakthrough time of at least 8 hours. Protection class 6. Protective gloves according to standards EN 420 and EN 374. Change protective gloves regularly.

Other skin and body protection
Protective clothing when needed. Wear anti-static protective clothing if there is a risk of ignition from static electricity.

5/25
**Aviation Jet Fuel JET A-1 (JETA1)**

**Respiratory protection**
Filter device/half mask Gas filter, type A2. Filter device could be used maximum 2 hours at a time. Filter devices must not be used in conditions where the oxygen level is low (< 19 vol.-%). At high concentrations a breathing apparatus must be used (self-contained or fresh air hose breathing apparatus). Filter must be changed often enough. Respirator according to standard EN 140.

**Environmental exposure controls**
Take precautions against leakage by constructing collecting pools and sewerage systems as well as by surfacing the loading and unloading stations.

#### 9.2. Other information

Other information: Not known.

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

**Reactivity**
There are no known reactivity hazards associated with this product.

#### 10.2. Chemical stability

**Stability**
Stable at normal ambient temperatures and when used as recommended.

#### 10.3. Possibility of hazardous reactions
Aviation Jet Fuel JET A-1 (JETA1)

Possibility of hazardous reactions
No potentially hazardous reactions known.

10.4. Conditions to avoid
Conditions to avoid
Keep away from heat, sparks and open flame.

10.5. Incompatible materials
Materials to avoid
Oxidising agents.

10.6. Hazardous decomposition products
Hazardous decomposition products
Does not decompose when used and stored as recommended.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Toxicological effects
Based on available data the classification criteria are not met.

Skin corrosion/irritation
Skin corrosion/irritation

Serious eye damage/irritation
Serious eye damage/irritation
Based on available data the classification criteria are not met. (EPA OTS 798.4500)

Skin sensitisation
Skin sensitisation
Based on available data the classification criteria are not met. (OECD 406, EPA OTS 798.4100)

Germ cell mutagenicity
Genotoxicity - in vitro
Based on available data the classification criteria are not met. (OECD 471, modified Ames test, 479)

Genotoxicity - in vivo
Based on available data the classification criteria are not met. (OECD 479)

Carcinogenicity
Carcinogenicity
Based on available data the classification criteria are not met. (OECD 451)

Reproductive toxicity
Reproductive toxicity - fertility
Based on available data the classification criteria are not met. (OECD 415)

Reproductive toxicity - development
Based on available data the classification criteria are not met. (OECD 414)

Specific target organ toxicity - single exposure
STOT - single exposure
May cause nausea, headache, dizziness and intoxication. Anaesthetic in high concentrations.

Specific target organ toxicity - repeated exposure
STOT - repeated exposure
Based on available data the classification criteria are not met. (OECD 408, 411, 413)

Aspiration hazard
Aspiration hazard
May be fatal if swallowed and enters airways. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

Toxicological information on ingredients.

Renewable hydrocarbons (kerosine type fraction)
Aviation Jet Fuel JET A-1 (JETA1)

Acute toxicity - oral
Notes (oral LD₅₀) \(LD₅₀ > 2000\ mg/kg,\ Oral,\ Rat\ (EC\ B1\ tris)\)

Acute toxicity - dermal
Notes (dermal LD₅₀) \(LD₅₀ > 2000\ mg/kg,\ Dermal,\ Rat\ (EC\ B3)\)

Category: Kerosines

Acute toxicity - oral
Notes (oral LD₅₀) \(LD₅₀ > 5000\ mg/kg,\ Oral,\ Rat\ (OECD\ 420,\ EPA\ OTS\ 798.1175)\)

Acute toxicity - dermal
Notes (dermal LD₅₀) \(LD₅₀ > 2000\ mg/kg,\ Dermal,\ Rabbit\ (OECD\ 402,\ EPA\ OTS\ 798.1100)\)

Acute toxicity - inhalation
Notes (inhalation LC₅₀) \(LC₅₀ > 5,28\ mg/l,\ Inhalation,\ Rat\ (4h)\ (OECD\ 403)\)

SECTION 12: Ecological information

12.1. Toxicity
Toxicity
Toxic to aquatic life with long lasting effects.

Acute aquatic toxicity

Ecological information on ingredients.

Renewable hydrocarbons (kerosine type fraction)

Acute aquatic toxicity
Acute toxicity - fish \(LL₅₀,\ 96\ hours: > 1000\ mg/l,\ WAF\ (OECD\ 203)\)

Acute toxicity - aquatic invertebrates \(EL₅₀,\ 48\ hours: > 100\ mg/l,\ WAF\ (OECD\ 202)\)

Acute toxicity - aquatic plants \(EL₅₀,\ 72\ hours: > 100\ mg/l,\ WAF\ (OECD\ 201)\)

Acute toxicity - microorganisms \(EC₅₀,\ 3\ hours: > 1000\ mg/l,\ Micro-organisms\ (wastewater\ sludge)\ (OECD\ 209)\)

Chronic aquatic toxicity
Chronic toxicity - aquatic invertebrates \(NOEC,\ 21\ days: 1\ mg/l,\ LOEC,\ 21\ days: 3,2\ mg/l,\ Daphnia\ magna\ WAF\ (OECD\ 211)\)

NOEC, 10 days: 373 mg/kg,
\(LC₅₀,\ 10\ days: 1200\ mg/kg,\ Sediment\ organisms\ (OSPAR\ Protocols,\ Part\ A:\ Sediment\ Bioassay,\ 2005)\)

Category: Kerosines

Acute aquatic toxicity
Acute toxicity - fish \(LL₅₀,\ 24\ hours: 5-17\ mg/l,\ Oncorhynchus\ mykiss\ (Rainbow\ trout)\)

\(LL₅₀,\ 48\ hours: 2-5\ mg/l,\ Oncorhynchus\ mykiss\ (Rainbow\ trout)\)

WAF\ (OECD\ 203)
Aviation Jet Fuel JET A-1 (JETA1)

Acute toxicity - aquatic invertebrates
EL50, 24 hours: 4.6 mg/l, Daphnia magna
EL50, 48 hours: 1.4 mg/l, Daphnia magna
NOEL, 48 hours: 0.3 mg/l, Daphnia magna
WAF (OECD 202)

Acute toxicity - aquatic plants
EL50, 24 hours: 1-3 mg/l, Pseudokirchneriella subcapitata
NOEL, 24 hours: 1 mg/l, Pseudokirchneriella subcapitata
WAF (OECD 201)

Chronic aquatic toxicity

Chronic toxicity - fish early life stage
NOEL, 28 days: 0.1 mg/l, Oncorhynchus mykiss (Rainbow trout)
(QSAR)

Chronic toxicity - aquatic invertebrates
EL50, 21 days: 0.81 mg/l, Daphnia magna
NOEL, 21 days: 0.48 mg/l, Daphnia magna
WAF (OECD 211)

12.2. Persistence and degradability

Persistence and degradability
The product contains volatile substances which may spread in the atmosphere. Can be photodegraded in the atmosphere.

Stability (hydrolysis)
No significant reaction in water.

Ecological information on ingredients.

Renewable hydrocarbons (kerosine type fraction)

Biodegradation
Rapidly degradable
(OECD 301B)

Category: Kerosines

Biodegradation
Inherently biodegradable.
(OECD 301F)

12.3. Bioaccumulative potential

Bioaccumulative potential
Possibly bioaccumulative.

Partition coefficient
log Kow: > 3

12.4. Mobility in soil

Mobility
Evaporates slowly. The product has poor water-solubility. Product can penetrate soil until reaching the surface of ground water. The product contains substances which are bound to particulate matter and are retained in soil.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment
This product does not contain any substances classified as PBT or vPvB.

12.6. Other adverse effects

Other adverse effects
Product causes fouling, and direct contact produces harmful effects e.g. to birds and vegetation. Adsorbed hydrocarbon residues can be harmful to sediment organisms.

SECTION 13: Disposal considerations

13.1. Waste treatment methods
Aviation Jet Fuel JET A-1 (JETA1)

Disposal methods
Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

SECTION 14: Transport information

Sea transport notes
This cargo is considered an Energy-rich fuel and effective 1 January 2019 should be carried subject to Annex I of MARPOL, see Annex 12 of MEPC.2/Circ.24. Please also refer to MEPC.1/Circ.879 - GUIDELINES FOR THE CARRIAGE OF ENERGY-RICH FUELS AND THEIR BLENDS

14.1. UN number
UN No. (ADR/RID) 1863

14.2. UN proper shipping name
Proper shipping name (ADR/RID) UN 1863 FUEL, AVIATION, TURBINE ENGINE

14.3. Transport hazard class(es)
ADR/RID class 3

14.4. Packing group
ADR/RID packing group III

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant MARINE POLLUTANT

14.6. Special precautions for user
Hazard Identification Number (ADR/RID) 30
Tunnel restriction code (D/E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

15.2. Chemical safety assessment
A chemical safety assessment has been carried out.
Aviation Jet Fuel JET A-1 (JETA1)

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet
EU OELV = European Occupational Exposure Limit Value

Key literature references and sources for data

Training advice
DO NOT SIPHON PRODUCT BY MOUTH SUCTION.

Revision comments
Updated, sections: 3.2, 8.1, 9.1, 11.1, 12.1-12.2, 14.0, 16. Revised formulation. NOTE: Lines within the margin indicate significant changes from the previous revision.

Revision date
08/06/2020

Supersedes date
17/02/2020

SDS number
5306

Hazard statements in full
H226 Flammable liquid and vapour.
H304 May be fatal if swallowed and enters airways.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H411 Toxic to aquatic life with long lasting effects.
## Exposure scenario
### Distribution of Substance - Industrial

<table>
<thead>
<tr>
<th>Identification</th>
</tr>

### 1. Title of exposure scenario
**Main title**
Distribution of Substance - Industrial

**Process scope**
Loading (including marine vessel/barge, rail/road car and IBC loading) and repacking (including drums and small packs) of substance, including its sampling, storage, unloading distribution and associated laboratory activities.

### Environment
**Environmental release category**
- ERC4 Use of non-reactive processing aid at industrial site (no inclusion into or onto article)
- ERC5 Use at industrial site leading to inclusion into/onto article
- ERC6a Use of intermediate
- ERC6b Use of reactive processing aid at industrial site (no inclusion into or onto article)
- ERC6c Use of monomer in polymerisation processes at industrial site (inclusion or not into/onto article)
- ERC6d Use of reactive process regulators in polymerisation processes at industrial site (inclusion or not into/onto article)
- ERC7 Use of functional fluid at industrial site

**SPERC**
ESVOC SPERC 1.1b.v1

### Worker
**Process category**
- PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions
- PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions
- PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition
- PROC4 Chemical production where opportunity for exposure arises
- PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities
- PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
- PROC9 Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
- PROC15 Use as laboratory reagent.

### 2. Conditions of use affecting exposure (Industrial - Environment 1)

#### Product characteristics
Substance is complex UVCB. Predominantly hydrophobic.

#### Amounts used
- Fraction of EU tonnage used in region: 0.1
- Regional use tonnage: 8,700,000 tonnes/year
- Fraction of Regional tonnage used locally: 1
- Annual site tonnage: 17,000 tonnes
- Maximum daily site tonnage: 58 tonnes
Distribution of Substance - Industrial

Frequency and duration of use
Continuous release.
Emission days: 300 days/year

Other given operational conditions affecting environmental exposure

Emission factor - air
Release fraction to air from process (initial release prior to RMM): 1.0E-03

Emission factor - water
Release fraction to wastewater from process (initial release prior to RMM): 1.0E-05

Emission factor - soil
Release fraction to soil from process (initial release prior to RMM): 1.0E-05

Environmental factors not influenced by risk management measures
Dilution
Local freshwater dilution factor: 10
Local marine water dilution factor: 100

Risk management measures

Good practice
Common practices vary across sites, thus conservative process release estimates used.
Risk from environmental exposure is driven by freshwater sediment.

STP details
Estimated substance removal from wastewater via domestic sewage treatment: 95%
Removal efficiency (total): 95%
Maximum allowable site tonnage (Msafe), based on release following total wastewater
treatment removal: 2.1E+06 kg/day
Assumed domestic sewage treatment plant flow (m³/day): 2000.

Technical onsite conditions and measures to reduce or limit discharges to air, water and soil

Air
Treat air emission to provide a typical removal efficiency of 90%.

Water
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal
efficiency of (%): 0.0 If discharging to domestic sewage treatment plant, no onsite wastewater
treatment required.

Soil
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or
reclaimed.

Conditions and measures related to external treatment of waste for disposal

Waste treatment
External treatment and disposal of waste should comply with applicable local and/or national
regulations.

Conditions and measures related to external recovery of waste

Recovery method
External recovery and recycling of waste should comply with applicable local and/or national
regulations.

2. Conditions of use affecting exposure (Workers - Health 1)

Product characteristics
Physical state
Liquid

Vapour pressure
Vapour pressure 0.5 - 10 kPa at STP.

Concentration details
Covers percentage substance in the product up to 100% (unless stated differently).

Frequency and duration of use
Covers daily exposures up to 8 hours (unless stated differently).

Other given operational conditions affecting workers exposure
Distribution of Substance - Industrial

**Setting**
Assumes a good basic standard of occupational hygiene is implemented.

**Temperature**
Assumes use at not more than 20°C above ambient temperature, unless stated differently.

**Organisational measures to prevent/limit releases, dispersion and exposure**

**Organisational measures**
General measures (skin irritants) Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

**Risk management measures**
General exposures (closed systems)
No other specific measures identified.

General exposures (open systems)
No other specific measures identified.

Process sampling
No other specific measures identified.

Laboratory activities
No other specific measures identified.

Bulk transfers
No other specific measures identified.

Drum and small package filling
No other specific measures identified.

Equipment cleaning and maintenance
No other specific measures identified.

Bulk product storage
No other specific measures identified.

3. Exposure estimation (Environment 1)

**Assessment method**
Used Petrorisk model. (Hydrocarbon Block Method)

Maximum Risk Characterisation Ratios for air emissions 2.3E-04 Maximum Risk Characterisation Ratios for wastewater emissions 1.3E-02

4. Guidance to check compliance with the exposure scenario (Environment 1)

Guidance is based on assumed operating conditions which may not be applicable to all sites, thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. Required removal efficiency for air can be achieved using onsite technologies, either alone or in combination. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

3. Exposure estimation (Health 1)

**Assessment method**
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated
Distribution of Substance - Industrial

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Qualitative approach used to conclude safe use. Available hazard data do not support the need for a DNEL to be established for other health effects. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

4. Guidance to check compliance with the exposure scenario (Health 1)

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

### 2. Conditions of use affecting exposure (Industrial - Environment 1)

#### Product characteristics

Substance is complex UVCB. Predominantly hydrophobic.

#### Amounts used

- Fraction of EU tonnage used in region: 0.1
- Regional use tonnage: 6,800,000 tonnes/year
- Fraction of Regional tonnage used locally: 1
- Annual site tonnage: 30,000 tonnes
- Maximum daily site tonnage: 100 tonnes

#### Frequency and duration of use

- Continuous release.
- Emission days: 300 days/year
Formulation & (Re)packing of Substances and Mixtures - Industrial

Other given operational conditions affecting environmental exposure

Emission factor - air  
Release fraction to air from process (after typical onsite RMMs consistent with EU Solvent Emissions Directive requirements): 2.5E-02

Emission factor - water  
Release fraction to wastewater from process (initial release prior to RMM): 2.0E-04

Emission factor - soil  
Release fraction to soil from process (initial release prior to RMM): 1.0E-04

Environmental factors not influenced by risk management measures

Dilution  
Local freshwater dilution factor: 10
Local marine water dilution factor: 100

Risk management measures

Good practice  
Common practices vary across sites, thus conservative process release estimates used.
Risk from environmental exposure is driven by freshwater sediment.

STP type  
Municipal STP.

STP details  
Estimated substance removal from wastewater via domestic sewage treatment: 95.0%
Removal efficiency (total): 95.0%
Maximum allowable site tonnage (Msafe), based on release following total wastewater treatment removal: 100 tonne/day
Assumed domestic sewage treatment plant flow (m³/day): 2000.

Technical onsite conditions and measures to reduce or limit discharges to air, water and soil

Air  
Treat air emission to provide a typical removal efficiency of 0%.

Water  
Prevent leaks and prevent soil/water pollution caused by leaks. Onsite wastewater treatment required. Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%): 94.8 If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of (%): 0.0

Soil  
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.

Conditions and measures related to external treatment of waste for disposal

Waste treatment  
External treatment and disposal of waste should comply with applicable local and/or national regulations.

Conditions and measures related to external recovery of waste

Recovery method  
External recovery and recycling of waste should comply with applicable local and/or national regulations.

2. Conditions of use affecting exposure (Workers - Health 1)

Product characteristics

Physical state  
Liquid

Vapour pressure  
Vapour pressure 0.5 - 10 kPa at STP.

Concentration details  
Covers percentage substance in the product up to 100% (unless stated differently).

Frequency and duration of use  
Covers daily exposures up to 8 hours (unless stated differently).

Other given operational conditions affecting workers exposure

Setting  
 Assumes a good basic standard of occupational hygiene is implemented.
Formulation & (Re)packing of Substances and Mixtures - Industrial

**Temperature**
Assumes use at not more than 20°C above ambient temperature, unless stated differently.

**Organisational measures to prevent/limit releases, dispersion and exposure**

**Organisational measures**
General measures (skin irritants) Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

**Risk management measures**
General exposures (closed systems)
No other specific measures identified.

General exposures (open systems)
No other specific measures identified.

Process sampling
No other specific measures identified.

Laboratory activities
No other specific measures identified.

Bulk transfers
No other specific measures identified.

Mixing operations
