SAFETY DATA SHEET
Aviation Jet Fuel JET A-1 (JETA1)

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name
Aviation Jet Fuel JET A-1 (JETA1)

Product number
ID 10505

Internal identification
145163

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses
Distribution of substance (ES01a) Formulation & (re)packing of substances and mixtures (ES02) Use as a fuel (ES12a, ES12b)

Uses advised against
Consumer Professional use.
Uses in coatings Use in cleaning agents Lubricants Metal working fluids/rolling oils Use as binders and release agents Use in agrochemicals Road and construction applications Explosives manufacture & use

1.3. Details of the supplier of the safety data sheet

Supplier
Neste Oyj
Keilaranta 21, Espoo, P.O.B. 95, FIN-00095 NESTE, FINLAND
Tel. +358 10 45811
SDS@neste.com (chemical safety)

1.4. Emergency telephone number

National emergency telephone
+358-9-471 977, +358-9-4711, Poison Information Centre number

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (EC 1272/2008)

Physical hazards
Flam. Liq. 3 - H226

Health hazards
Skin Irrit. 2 - H315 STOT SE 3 - H336 Asp. Tox. 1 - H304

Environmental hazards
Aquatic Chronic 2 - H411

2.2. Label elements

Hazard pictograms

Signal word
Danger

Hazard statements
H226 Flammable liquid and vapour.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H304 May be fatal if swallowed and enters airways.
H411 Toxic to aquatic life with long lasting effects.
**Aviation Jet Fuel JET A-1 (JETA1)**

**Precautionary statements**
- P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
- P273 Avoid release to the environment.
- P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor.
- P331 Do NOT induce vomiting.
- P261 Avoid breathing vapours.
- P280 Wear protective gloves.

**Contains**
Kerosine (petroleum), sweetened, Distillates (petroleum), hydrotreated light; Kerosine - unspecified, Kerosine (petroleum), hydrodesulfurized

**2.3. Other hazards**
Evaporates slowly. May cause eye and respiratory system irritation. Risk of soil and ground water contamination.

### SECTION 3: Composition/information on ingredients

#### 3.2. Mixtures

Aviation Jet Fuel JET A-1 (JETA1)

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

Composition comments
Mixture of a petroleum product and additives. Total aromatics at maximum: 26.5 %. Naphthalene (CAS 91-20-3) < 1 %. Toluene (CAS 108-88-3) < 1%. Benzene (CAS 71-43-2) < 0.1 %.

SECTION 4: First aid measures

4.1. Description of first aid measures

Inhalation
Remove person to fresh air and keep comfortable for breathing. For breathing difficulties, oxygen may be necessary. If breathing stops, provide artificial respiration. Get medical attention if symptoms are severe or persist.

Ingestion
Do not induce vomiting. Get medical attention immediately.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if irritation persists after washing.

Eye contact
Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation persists after washing.

4.2. Most important symptoms and effects, both acute and delayed

General information
Irritating to skin. May irritate eyes. Vapours in high concentrations are narcotic. May cause nausea, headache, dizziness and intoxication. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
Water spray, foam, dry powder or carbon dioxide.

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards
Flammable liquid and vapour. Containers can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products
Carbon dioxide (CO2). Carbon monoxide (CO).

5.3. Advice for firefighters

Protective actions during firefighting
Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Prevent fire extinguishing water from contaminating surface water or the ground water system.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions
Avoid inhalation of vapours and contact with skin and eyes. Wear adequate protective equipment at all operations.
**Aviation Jet Fuel JET A-1 (JETA1)**

**For emergency responders**
Prevent unauthorized access. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back. Eliminate all ignition sources if safe to do so. Take precautionary measures against static discharge.

**6.2. Environmental precautions**

**Environmental precautions**
Avoid release to the environment. Stop leak if safe to do so. Avoid the spillage or runoff entering drains, sewers or watercourses. Contain spillage with sand, earth or other suitable non-combustible material. Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air). Risk of soil and ground water contamination.

**6.3. Methods and material for containment and cleaning up**

**Methods for cleaning up**
Immediately start clean-up of the liquid and contaminated soil. Small Spillages: Absorb spillage with sand or other inert absorbent. Pay attention to the fire and health hazards caused by the product. Take care as floors and other surfaces may become slippery.

**6.4. Reference to other sections**

**Reference to other sections**
For personal protection, see Section 8.

### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

**Usage precautions**
The product contains volatile substances which may spread in the atmosphere. Avoid heat, flames and other sources of ignition. Take precautionary measures against static discharges. Use only non-sparking tools. Ground/bond container and receiving equipment. All handling should only take place in well-ventilated areas. Avoid inhalation of vapours and contact with skin and eyes. Use personal protective equipment and/or local ventilation when needed. Do not eat, drink or smoke when using this product. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. Wash contaminated clothing before reuse. During tank operations follow special instructions (risk of oxygen displacement and hydrocarbons).

#### 7.2. Conditions for safe storage, including any incompatibilities

**Storage precautions**
Flammable liquid storage. Vapours may form explosive mixtures with air. Store in accordance with local regulations. Store in a demarcated bunded area to prevent release to drains and/or watercourses. Take precautions against leakage by constructing collecting pools and sewerage systems as well as by surfacing the loading and unloading stations. Only store in correctly labelled containers. Use containers made of the following materials: Carbon steel. Stainless steel. Keep container tightly closed. Protect from sunlight.

#### 7.3. Specific end use(s)

**Specific end use(s)**
Not known.

### SECTION 8: Exposure controls/Personal protection

#### 8.1. Control parameters

**Occupational exposure limits**
Solvent naphtha, group 3: 100mg/m³ (8h), HTP 2018/FIN.
The individual limit values can be applied for the hydrocarbons.

**naphthalene**
Naphthalene: 1 ppm (8h), 5 mg/m³ (8h), 2 ppm (15min), 10mg/m³ (15min), HTP 2018/FIN.
Naphthalene: 10 ppm (8h), 50 mg/m³ (8h), EU OELV (EC/1991/322).

**Benzene**
Benzene: 1 ppm (8h), 3,25 mg/m³, VNa 716/2000/FIN (binding limit value).
May be absorbed through the skin.
Aviation Jet Fuel JET A-1 (JETA1)

toluene

Toluene: 25 ppm (8h), 81 mg/m³ (8h), 100 ppm (15min), 380 mg/m³ (15min), HTP 2018/FIN.
Toluene: 50 ppm (8h), 192 mg/m³ (8h), 100 ppm (15min), 384 mg/m³ (15min), EU OELV (EC/2006/15)
May be absorbed through the skin.

DNEL
PNEC

8.2. Exposure controls

Appropriate engineering controls
All handling should only take place in well-ventilated areas. Use personal protective equipment and/or local ventilation when needed. Handle in accordance with good industrial hygiene and safety practice. During tank operations follow special instructions (risk of oxygen displacement and hydrocarbons).

Eye/face protection
Tight-fitting safety glasses.

Hand protection
Wear protective gloves. It is recommended that gloves are made of the following material: Nitrile rubber. Neoprene. Polyvinyl chloride (PVC). The selected gloves should have a breakthrough time of at least 8 hours. Protection class 6. Protective gloves according to standards EN 420 and EN 374. Change protective gloves regularly.

Other skin and body protection
Protective clothing when needed. Wear anti-static protective clothing if there is a risk of ignition from static electricity.

Respiratory protection
Filter device/half mask Gas filter, type A2. Filter device could be used maximum 2 hours at a time. Filter devices must not be used in conditions where the oxygen level is low (< 19 vol.-%). At high concentrations a breathing apparatus must be used (self-contained or fresh air hose breathing apparatus). Filter must be changed often enough. Respirator according to standard EN 140.

Environmental exposure controls
Take precautions against leakage by constructing collecting pools and sewerage systems as well as by surfacing the loading and unloading stations.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance
Liquid.

Colour
Clear.

Odour
Hydrocarbons.

Odour threshold
-

pH
-

Melting point
\( \leq -47^\circ\text{C} \) (ASTM D2386, D5972, IP 529)

Initial boiling point and range
170 - 300°C (ASTM D 86)

Flash point
\( \geq 38^\circ\text{C} \) (IP 170)

Upper/lower flammability or explosive limits
Lower flammable/explosive limit: 0.6 % Upper flammable/explosive limit: 6 %

Vapour pressure
\(~ 2 \text{ kPa @ } 38^\circ\text{C}\)

Vapour density
\( > 3 \) (Air = 1.0)

Relative density
0.775 - 0.840 @ 15°C (ASTM D4052)

Solubility(ies)
The product has poor water-solubility. < 50 mg/l @ 20°C
Aviation Jet Fuel JET A-1 (JETA1)

Partition coefficient
log Kow: > 3

Auto-ignition temperature
~ 250°C

Decomposition Temperature
-

Viscosity
Kinematic viscosity < 7 mm²/s @ 40°C

Explosive properties
Not considered to be explosive.

Oxidising properties
Does not meet the criteria for classification as oxidising.

9.2. Other information
Other information
Not known.

SECTION 10: Stability and reactivity

10.1. Reactivity
Reactivity
There are no known reactivity hazards associated with this product.

10.2. Chemical stability
Stability
Stable at normal ambient temperatures and when used as recommended.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
No potentially hazardous reactions known.

10.4. Conditions to avoid
Conditions to avoid
Keep away from heat, sparks and open flame.

10.5. Incompatible materials
Materials to avoid
Oxidising agents.

10.6. Hazardous decomposition products
Hazardous decomposition products
Does not decompose when used and stored as recommended.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Toxicological effects
Based on available data the classification criteria are not met.

Acute toxicity - oral
Notes (oral LD₅₀)
LD₅₀ > 5000 mg/kg, Oral, Rat (OECD 420, EPA OTS 798.1175)

Acute toxicity - dermal
Notes (dermal LD₅₀)
LD₅₀ > 2000 mg/kg, Dermal, Rabbit (OECD 402, EPA OTS 798.1100)

Acute toxicity - inhalation
Notes (inhalation LC₅₀)
LC₅₀ > 5,28 mg/l, Inhalation, Rat (4h) (OECD 403)

Skin corrosion/irritation

Serious eye damage/irritation
Based on available data the classification criteria are not met. (EPA OTS 798.4500)
Aviation Jet Fuel JET A-1 (JETA1)

**Skin sensitisation**
Based on available data the classification criteria are not met. (OECD 406, EPA OTS 798.4100)

**Germ cell mutagenicity**
**Genotoxicity - in vitro**
Based on available data the classification criteria are not met. (OECD 471, modified Ames test, 479)

**Genotoxicity - in vivo**
Based on available data the classification criteria are not met. (OECD 479)

**Carcinogenicity**
**Carcinogenicity**
Based on available data the classification criteria are not met. (OECD 451)

**Reproductive toxicity**
**Reproductive toxicity - fertility**
Based on available data the classification criteria are not met. (OECD 415)

**Reproductive toxicity - development**
Based on available data the classification criteria are not met. (OECD 414)

**Specific target organ toxicity - single exposure**
**STOT - single exposure**
May cause nausea, headache, dizziness and intoxication. Anaesthetic in high concentrations.

**Specific target organ toxicity - repeated exposure**
**STOT - repeated exposure**
Based on available data the classification criteria are not met. (OECD 408, 411, 413)

**Aspiration hazard**
**Aspiration hazard**
May be fatal if swallowed and enters airways. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

### SECTION 12: Ecological Information

#### 12.1. Toxicity

**Toxicity**
Toxic to aquatic life with long lasting effects.

**Acute aquatic toxicity**

**Acute toxicity - fish**
LL₅₀, 24 hours: 5-17 mg/l, Oncorhynchus mykiss (Rainbow trout)
LL₅₀, 48 hours: 2-5 mg/l, Oncorhynchus mykiss (Rainbow trout)
WAF (OECD 203)

**Acute toxicity - aquatic invertebrates**
EL₅₀, 24 hours: 4,6 mg/l, Daphnia magna
EL₅₀, 48 hours: 1,4 mg/l, Daphnia magna
NOEL, 48 hours: 0,3 mg/l, Daphnia magna
WAF (OECD 202)

**Acute toxicity - aquatic plants**
EL₅₀, 24 hours: 1-3 mg/l, Pseudokirchneriella subcapitata
NOEL, 24 hours: 1 mg/l, Pseudokirchneriella subcapitata
WAF (OECD 201)

**Chronic aquatic toxicity**

**Chronic toxicity - fish early life stage**
NOEL, 28 days: 0,1 mg/l, Oncorhynchus mykiss (Rainbow trout)
(QSAR)

**Chronic toxicity - aquatic invertebrates**
EL₅₀, 21 days: 0,81 mg/l, Daphnia magna
NOEL, 21 days: 0,48 mg/l, Daphnia magna
WAF (OECD 211)

#### 12.2. Persistence and degradability

**Persistence and degradability**
The product contains volatile substances which may spread in the atmosphere. Can be photodegraded in the atmosphere.
Aviation Jet Fuel JET A-1 (JETA1)

Stability (hydrolysis)  No significant reaction in water.

Biodegradation  Inherently biodegradable.  
(OECD 301F)

12.3. Bioaccumulative potential

Bioaccumulative potential  Possibly bioaccumulative.

Partition coefficient  log Kow: > 3

12.4. Mobility in soil

Mobility  Evaporates slowly. The product has poor water-solubility. Product can penetrate soil until reaching the surface of ground water. The product contains substances which are bound to particulate matter and are retained in soil.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment  This product does not contain any substances classified as PBT or vPvB.

12.6. Other adverse effects

Other adverse effects  Product causes fouling, and direct contact produces harmful effects e.g. to birds and vegetation. Adsorbed hydrocarbon residues can be harmful to sediment organisms.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Disposal methods  Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

SECTION 14: Transport information

14.1. UN number

UN No. (ADR/RID)  1863

14.2. UN proper shipping name

Proper shipping name  (ADR/RID)  UN 1863 FUEL, AVIATION, TURBINE ENGINE

14.3. Transport hazard class(es)

ADR/RID class  3

14.4. Packing group

ADR/RID packing group  III

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant  MARINE POLLUTANT

14.6. Special precautions for user

Hazard Identification Number  (ADR/RID)  30

Tunnel restriction code  (D/E)
Aviation Jet Fuel JET A-1 (JETA1)

14.7. Transport in bulk according to ANNEX II of MARPOL and the IBC Code

Transport in bulk according to ANNEX II of MARPOL 73/78 and the IBC Code

Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislation

15.2. Chemical safety assessment

A chemical safety assessment has been carried out.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet
EU OELV = European Occupational Exposure Limit Value

Key literature references and sources for data

Training advice
DO NOT SIPHON PRODUCT BY MOUTH SUCTION.

Revision comments
NOTE: Lines within the margin indicate significant changes from the previous revision.

Revision date
17/02/2020

Supersedes date
11/03/2019

SDS number
5306

Hazard statements in full
H226 Flammable liquid and vapour.
H304 May be fatal if swallowed and enters airways.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H411 Toxic to aquatic life with long lasting effects.

Distribution of Substance - Industrial

**Frequency and duration of use**

Continuous release.
Emission days: 300 days/year

**Other given operational conditions affecting environmental exposure**

**Emission factor - air**
Release fraction to air from process (initial release prior to RMM): 1.0E-03

**Emission factor - water**
Release fraction to wastewater from process (initial release prior to RMM): 1.0E-05

**Emission factor - soil**
Release fraction to soil from process (initial release prior to RMM): 1.0E-05

**Environmental factors not influenced by risk management measures**

**Dilution**
Local freshwater dilution factor: 10
Local marine water dilution factor: 100

**Risk management measures**

**Good practice**
Common practices vary across sites, thus conservative process release estimates used.
Risk from environmental exposure is driven by freshwater sediment.

**STP details**
Estimated substance removal from wastewater via domestic sewage treatment: 95%
Removal efficiency (total): 95%
Maximum allowable site tonnage (Msafe), based on release following total wastewater treatment removal: 2.1E+06 kg/day
Assumed domestic sewage treatment plant flow (m³/day): 2000.

**Technical onsite conditions and measures to reduce or limit discharges to air, water and soil**

**Air**
Treat air emission to provide a typical removal efficiency of 90%.

**Water**
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%): 0.0 If discharging to domestic sewage treatment plant, no onsite wastewater treatment required.

**Soil**
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.

**Conditions and measures related to external treatment of waste for disposal**

**Waste treatment**
External treatment and disposal of waste should comply with applicable local and/or national regulations.

**Conditions and measures related to external recovery of waste**

**Recovery method**
External recovery and recycling of waste should comply with applicable local and/or national regulations.

---

**2. Conditions of use affecting exposure (Workers - Health 1)**

**Product characteristics**

**Physical state**
Liquid

**Vapour pressure**
Vapour pressure 0.5 - 10 kPa at STP.

**Concentration details**
Covers percentage substance in the product up to 100% (unless stated differently).

**Frequency and duration of use**
Covers daily exposures up to 8 hours (unless stated differently).

**Other given operational conditions affecting workers exposure**
Distribution of Substance - Industrial

Setting
Assumes a good basic standard of occupational hygiene is implemented.

Temperature
Assumes use at not more than 20°C above ambient temperature, unless stated differently.

Organisational measures to prevent/limit releases, dispersion and exposure

Organisational measures
General measures (skin irritants) Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

Risk management measures
General exposures (closed systems) No other specific measures identified.
General exposures (open systems) No other specific measures identified.
Process sampling No other specific measures identified.
Laboratory activities No other specific measures identified.
Bulk transfers No other specific measures identified.
Drum and small package filling No other specific measures identified.
Equipment cleaning and maintenance No other specific measures identified.
Bulk product storage No other specific measures identified.

3. Exposure estimation (Environment 1)

Assessment method
Used Petrorisk model. (Hydrocarbon Block Method)

Maximum Risk Characterisation Ratios for air emissions 2.3E-04 Maximum Risk Characterisation Ratios for wastewater emissions 1.3E-02

4. Guidance to check compliance with the exposure scenario (Environment 1)

Guidance is based on assumed operating conditions which may not be applicable to all sites, thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. Required removal efficiency for air can be achieved using onsite technologies, either alone or in combination. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

3. Exposure estimation (Health 1)

Assessment method
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated
Distribution of Substance - Industrial

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Qualitative approach used to conclude safe use. Available hazard data do not support the need for a DNEL to be established for other health effects. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

4. Guidance to check compliance with the exposure scenario (Health 1)

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.
Exposure scenario
Formulation & (Re)packing of Substances and Mixtures - Industrial

Identification

Product name: Kerosines
Version number: 2018
Es reference: ES02

1. Title of exposure scenario

Main title: Formulation & (Re)packing of Substances and Mixtures - Industrial
Process scope: Formulation, packing and re-packing of the substance and its mixtures in batch or continuous operations, including storage, materials transfers, mixing, tabletting, compression, pelletisation, extrusion, large and small scale packing, sampling, maintenance and associated laboratory activities.

Environment

Environmental release category: ERC2 Formulation into mixture

PROC14 Tabletting, compression, extrusion, pelletisation, granulation
PROC15 Use as laboratory reagent.

2. Conditions of use affecting exposure (Industrial - Environment 1)

Product characteristics

Substance is complex UVCB. Predominantly hydrophobic.

Amounts used

Fraction of EU tonnage used in region: 0.1
Regional use tonnage: 6,800,000 tonnes/year
Fraction of Regional tonnage used locally: 1
Annual site tonnage: 30,000 tonnes
Maximum daily site tonnage: 100 tonnes

Frequency and duration of use

Continuous release.
Emission days: 300 days/year
Formulation & (Re)packing of Substances and Mixtures - Industrial

**Temperature**
Assumes use at not more than 20°C above ambient temperature, unless stated differently.

**Organisational measures to prevent/limit releases, dispersion and exposure**

**Organisational measures**
General measures (skin irritants) Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

**Risk management measures**

General exposures (closed systems)
No other specific measures identified.

General exposures (open systems)
No other specific measures identified.

Process sampling
No other specific measures identified.

**3. Exposure estimation (Environment 1)**

**Assessment method**
Used Petrorisk model. (Hydrocarbon Block Method)

Maximum Risk Characterisation Ratios for air emissions 1.6E-02 Maximum Risk Characterisation Ratios for wastewater emissions 9.7E-01

**4. Guidance to check compliance with the exposure scenario (Environment 1)**
Formulation & (Re)packing of Substances and Mixtures - Industrial

Guidance is based on assumed operating conditions which may not be applicable to all sites, thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. Required removal efficiency for air can be achieved using onsite technologies, either alone or in combination. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

3. Exposure estimation (Health 1)

Assessment method

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Qualitative approach used to conclude safe use. Available hazard data do not support the need for a DNEL to be established for other health effects. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

4. Guidance to check compliance with the exposure scenario (Health 1)

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Continuous release.
Emission days: 300 days/year

Other given operational conditions affecting environmental exposure

Emission factor - air
Release fraction to air from process (initial release prior to RMM): 5.0E-02

Emission factor - water
Release fraction to wastewater from process (initial release prior to RMM): 1.0E-05

Emission factor - soil
Release fraction to soil from process (initial release prior to RMM): 0

Environmental factors not influenced by risk management measures
Use as a Fuel - Industrial

Dilution
Local freshwater dilution factor: 10
Local marine water dilution factor: 100

Risk management measures
Good practice
Common practices vary across sites, thus conservative process release estimates used.
Risk from environmental exposure is driven by freshwater sediment.

STP type
Municipal STP.

STP details
Estimated substance removal from wastewater via domestic sewage treatment: 95.0%
Removal efficiency (total): 95%
Maximum allowable site tonnage (Msafe), based on release following total wastewater treatment removal: 2.1E+06 tonne/day
Assumed domestic sewage treatment plant flow (m³/day): 2000.

Technical onsite conditions and measures to reduce or limit discharges to air, water and soil

Air
Treat air emission to provide a typical removal efficiency of 95%.

Water
Prevent leaks and prevent soil/water pollution caused by leaks. Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%): 94.4 If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of (%): 0.0

Soil
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.

Conditions and measures related to external treatment of waste for disposal
Waste treatment
Combustion emissions limited by required exhaust emission controls. Combustion emissions considered in regional exposure assessment.

Conditions and measures related to external recovery of waste
Recovery method
This substance is consumed during use and no waste of the substance is generated.

### 1. Title of exposure scenario

- **Main title**: Use as a Fuel - Professional
- **Process scope**: Covers the use as a fuel (or fuel additive) and includes activities associated with its transfer, use, equipment maintenance and handling of waste.

### Environment

- **Environmental release category**
  - ERC9a Widespread use of functional fluid (indoor)
  - ERC9b Widespread use of functional fluid (outdoor)

- **SPERC**: ESVOC SPERC 9.12b.v1

### Worker

- **Process category**
  - PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions
  - PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions
  - PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition
  - PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities
  - PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
  - PROC16 Use of fuels

### 2. Conditions of use affecting exposure (Industrial - Environment 1)

#### Product characteristics

- Substance is complex UVCB. Predominantly hydrophobic.

#### Amounts used

- Fraction of EU tonnage used in region: 0.1
- Regional use tonnage: 4,600,000 tonnes/year
- Fraction of Regional tonnage used locally: 1
- Annual site tonnage: 2300 tonnes
- Maximum daily site tonnage: 6.4 tonnes

#### Frequency and duration of use

- Continuous release.
- Emission days: 365 days/year

#### Other given operational conditions affecting environmental exposure

- **Emission factor - air**: Release fraction to air from wide dispersive use (regional only): 1.0E-03
- **Emission factor - water**: Release fraction to wastewater from wide dispersive use: 1.0E-05
- **Emission factor - soil**: Release fraction to soil from wide dispersive use (regional only): 1.0E-05

#### Environmental factors not influenced by risk management measures
**Use as a Fuel - Professional**

**Dilution**  
Local freshwater dilution factor: 10  
Local marine water dilution factor: 100

**Risk management measures**

**Good practice**  
Common practices vary across sites, thus conservative process release estimates used.  
Risk from environmental exposure is driven by fresh water.

**STP type**  
Municipal STP.

**STP details**  
Estimated substance removal from wastewater via domestic sewage treatment: 95.0%  
Removal efficiency (total): 95.0%  
Maximum allowable site tonnage (Msafe), based on release following total wastewater treatment removal: 2.9E+05 kg/day  
Assumed domestic sewage treatment plant flow (m³/day): 2000.

**Technical onsite conditions and measures to reduce or limit discharges to air, water and soil**

**Air**  
Treat air emission to provide a typical removal efficiency of N/A%.

**Water**  
Prevent leaks and prevent soil/water pollution caused by leaks. Onsite wastewater treatment required. Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%): 0.0  
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of (%): 0.0

**Soil**  
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.

**Conditions and measures related to external treatment of waste for disposal**

**Waste treatment**  
Combustion emissions limited by required exhaust emission controls. Combustion emissions considered in regional exposure assessment.

**Conditions and measures related to external recovery of waste**

**Recovery method**  
This substance is consumed during use and no waste of the substance is generated.

**2. Conditions of use affecting exposure (Workers - Health 1)**

**Product characteristics**

**Physical state**
