SAFETY DATA SHEET
NESSOL D60

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name
NESSOL D60

Chemical name
Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics

Product number
ID 10526

Internal Identification
135159, 137411, 137420, 137511, 137520.

Synonyms; trade names
Previous product name: NESSOL LIAV 230. Previous product number: 752511, 752520.

EU REACH registration number
01-2119457273-39-0000

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses
Manufacture of substance Distribution of substance Formulation & (re)packing of substances and mixtures Uses in coatings Use in cleaning agents Use in oil and gas field drilling and production operations Lubricants Metal working fluids/rolling oils Use as binders and release agents Use as a fuel Functional fluids Road and construction applications Other Consumer Uses Use in laboratories Explosives manufacture & use Polymer production Polymer processing Water treatment chemicals Mining chemicals De-icing and anti-icing applications Propellant

1.3. Details of the supplier of the safety data sheet

Supplier
Neste Oyj
Keilaranta 21, Espoo, P.O.B. 95, FIN-00095 NESTE, FINLAND
Tel. +358 10 45811
SDS@neste.com (chemical safety)

1.4. Emergency telephone number

Emergency telephone
+61 2 9186 1132, Chemwatch: International Emergency Response Phone Number

National emergency telephone number
+358 800 147 111, +358 9 471 977, Poison Information Centre

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (SI 2019 No. 720)

Physical hazards Not Classified

Health hazards Asp. Tox. 1 - H304

Environmental hazards Not Classified

2.2. Label elements
NESSOL D60

Hazard pictograms

Signal word Danger

Hazard statements H304 May be fatal if swallowed and enters airways.

Precautionary statements P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor. P331 Do NOT induce vomiting. P501 Dispose of contents/ container in accordance with national regulations.

Supplemental label information EUH066 Repeated exposure may cause skin dryness or cracking.

Contains Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics

2.3. Other hazards

Other hazards Combustible liquid. Evaporates slowly. Vapours may irritate throat/respiratory system. Risk of soil and ground water contamination.

This product does not contain substances considered to have endocrine disrupting properties at levels of 0.1% or higher.

SECTION 3: Composition/information on ingredients

3.1. Substances

<table>
<thead>
<tr>

Classification
Asp. Tox. 1 - H304

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

Product name NESSOL D60

Chemical name Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics

EU REACH registration number 01-2119457273-39-0000

Ingredient notes Total aromatics at maximum: 1 vol-%. Identity outside the EU (CAS number and name of the substance): 64742-48-9, Naphtha (petroleum), hydrotreated heavy Previous EC number: 265-150-3.

SECTION 4: First aid measures

4.1. Description of first aid measures

Inhalation Remove person to fresh air and keep comfortable for breathing. Get medical attention if symptoms are severe or persist.

Ingestion Do not induce vomiting. Get medical attention immediately.

Skin contact Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if irritation persists after washing.
NESSOL D60

Eye contact
Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation persists after washing.

4.2. Most important symptoms and effects, both acute and delayed

General information
Repeated exposure may cause skin dryness or cracking. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
Water spray, foam, dry powder or carbon dioxide.

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards
Combustible liquid. Containers can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products
Carbon dioxide (CO2). Carbon monoxide (CO).

5.3. Advice for firefighters

Protective actions during firefighting
Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Prevent fire extinguishing water from contaminating surface water or the ground water system.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions
Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Avoid inhalation of vapours and contact with skin and eyes. Wear adequate protective equipment at all operations.

For emergency responders
Prevent unauthorized access.

6.2. Environmental precautions

Environmental precautions
Avoid release to the environment. Stop leak if safe to do so. Avoid the spillage or runoff entering drains, sewers or watercourses. Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air). Risk of soil and ground water contamination.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up
Immediately start clean-up of the liquid and contaminated soil. Contain spillage with sand, earth or other suitable non-combustible material. Large spills should be collected mechanically (remove by pumping) for disposal. Pay attention to the fire and health hazards caused by the product.

6.4. Reference to other sections

Reference to other sections
For personal protection, see Section 8.

SECTION 7: Handling and storage
NESSOL D60

7.1. Precautions for safe handling

Usage precautions

This material is a static accumulator. Avoid heat, flames and other sources of ignition. Take precautionary measures against static discharges. Use only in well-ventilated areas. Try to avoid product volatilization during handling and transferring. Avoid inhalation of vapours and contact with skin and eyes. Use personal protective equipment and/or local ventilation when needed. Do not eat, drink or smoke when using this product. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. During tank operations follow special instructions (risk of oxygen displacement and hydrocarbons).

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

7.3. Specific end use(s)

Specific end use(s) Not known.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Ingredient comments

Solvent naphtha, group 1: 500 mg/m³ (8h), HTP 2020/FIN. The individual limit values can be applied for the hydrocarbons.

DNEL

DNEL derivation is not justified.

PNEC

Not available.

8.2. Exposure controls

Appropriate engineering controls

Provide adequate ventilation. Use personal protective equipment and/or local ventilation when needed. Handle in accordance with good industrial hygiene and safety practice.

Eye/face protection

Spectacles.

Hand protection

Wear protective gloves. It is recommended that gloves are made of the following material: Nitrile rubber. Neoprene. The breakthrough time for any glove material may be different for different glove manufacturers. Protective gloves according to standard EN 374. Change protective gloves regularly.

Other skin and body protection

Protective clothing when needed. Wear anti-static protective clothing if there is a risk of ignition from static electricity.

Respiratory protection

Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a respirator fitted with the following cartridge: Gas filter, type A2. Gas and combination filter cartridges suitable for intended use should be used. Filter must be changed often enough. At high concentrations a breathing apparatus must be used (self-contained or fresh air hose breathing apparatus).

Environmental exposure controls

Store in a demarcated bunded area to prevent release to drains and/or watercourses.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance Mobile liquid.

Colour Clear.

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

**Reactivity**

There are no known reactivity hazards associated with this product.

#### 10.2. Chemical stability

**Stability**

Stable at normal ambient temperatures and when used as recommended.

#### 10.3. Possibility of hazardous reactions

**Possibility of hazardous reactions**

No potentially hazardous reactions known.

#### 10.4. Conditions to avoid

**Conditions to avoid**

Keep away from heat, sparks and open flame. Take precautionary measures against static discharges.

#### 10.5. Incompatible materials

**Materials to avoid**

Oxidising agents.

#### 10.6. Hazardous decomposition products

**Hazardous decomposition products**

None known.
### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

**Toxicological effects**
Based on available data the classification criteria are not met.

**Skin corrosion/irritation**
Based on available data the classification criteria are not met. (OECD 404) Repeated exposure may cause skin dryness or cracking.

**Serious eye damage/irritation**
Based on available data the classification criteria are not met. (OECD 405).

**Skin sensitisation**
Based on available data the classification criteria are not met. (OECD 406).

**Germ cell mutagenicity**
Based on available data the classification criteria are not met. (OECD 471, 473, 476, 479).

**Genotoxicity - in vitro**
Based on available data the classification criteria are not met. (OECD 474).

**Carcinogenicity**
Based on available data the classification criteria are not met.

**Reproductive toxicity**
Based on available data the classification criteria are not met.

**Specific target organ toxicity - single exposure**
STOT - single exposure
Not classified as a specific target organ toxicant after a single exposure.

**Specific target organ toxicity - repeated exposure**
STOT - repeated exposure
Based on available data the classification criteria are not met. (OECD 408, 413)

**Aspiration hazard**
May be fatal if swallowed and enters airways. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

**General information**
This product does not contain substances considered to have endocrine disrupting properties at levels of 0.1% or higher.

**Toxicological information on ingredients.**

**Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics**

### SECTION 12: Ecological information

#### 12.1. Toxicity
NESSOL D60

Toxicity

Based on available data the classification criteria are not met.

Ecological information on ingredients.

Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics

Acute aquatic toxicity

Acute toxicity - fish
- LL₅₀, 96 hours: > 1000 mg/l, Oncorhynchus mykiss (Rainbow trout)
- LL₀, 96 hours: 1000 mg/l, Oncorhynchus mykiss (Rainbow trout) (OECD 203)

Acute toxicity - aquatic invertebrates
- LL₅₀, 48 hours: > 1000 mg/l, Daphnia magna
- LL₀, EL₀, 48 hours: 1000 mg/l, Daphnia magna (OECD 202)
- LL₅₀, 96 hours: > 1000 mg/l, Marine water
- NOELR, 96 hours: 32 mg/l, Marine water (EPA OPPTS 850.1020)

Acute toxicity - aquatic plants
- EL₅₀, 72 hours: > 1000 mg/l, Pseudokirchneriella subcapitata
- NOELR, 72 hours: 1000 mg/l, Pseudokirchneriella subcapitata (OECD 201)

Acute toxicity - microorganisms
- EL₀, 48 hours: > 1000 mg/l, Tetrahymena pyriformis (QSAR)

Chronic aquatic toxicity

Chronic toxicity - fish early life stage
- NOELR, 28 days: 0.101 mg/l, Oncorhynchus mykiss (Rainbow trout) (QSAR)

Chronic toxicity - aquatic invertebrates
- NOELR, 21 days: 0.176 mg/l, Daphnia magna (QSAR)

12.2. Persistence and degradability

Phototransformation
The product contains volatile substances which may spread in the atmosphere. Can be photodegraded in the atmosphere.

Stability (hydrolysis)
No significant reaction in water.

Ecological information on ingredients.

Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics

Biodegradation
Rapidly degradable
(OECD 301F)

12.3. Bioaccumulative potential

Bioaccumulative potential
No data available.

Partition coefficient
log Kow: > 3

12.4. Mobility in soil

Mobility
Evaporates slowly. Product can penetrate soil until reaching the surface of ground water. The product contains substances which are bound to particulate matter and are retained in soil.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment
This product does not contain any substances classified as PBT or vPvB.

12.6. Other adverse effects
NESSOL D60

Other adverse effects
Not known.

Endocrine-disrupting properties
This product does not contain substances considered to have endocrine disrupting properties at levels of 0.1% or higher.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information
Waste is classified as hazardous waste.

Disposal methods
Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Product residues retained in emptied containers can be hazardous. Waste packaging should be collected for reuse or recycling.

SECTION 14: Transport information

General
The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

14.1. UN number
UN No. (ADR/RID) -

14.2. UN proper shipping name
Proper shipping name (ADR/RID) -

14.3. Transport hazard class(es)
ADR/RID class -

14.4. Packing group
ADR/RID packing group -

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user
Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable. MARPOL Annex I cargo.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
NESSOL D60

National regulations
UK Registration number: UK-01-0468758243-9-XXXX.
Only Representative UK: Penman Consulting Limited 40, Aspect House, Waylands Avenue,
Grove Business Park, Wantage, Oxon, OX12 9FF, United Kingdom; Telephone: 01367 718474, Email: pcltd40@penmanconsulting.com.
Location of manufacture: Neste Porvoo Refinery, Finland.

EU regulatory references for the safety data sheet:
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
Chemicals (REACH) (as amended).
December 2008 on classification, labelling and packaging of substances and mixtures (as
amended).

Restrictions (SI 2020 No. 1577 Annex XVII)
Entry number: 3 (lamp oils and grill lighter fluids)

15.2. Chemical safety assessment
A chemical safety assessment has been carried out.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet
DNEL = Derived No-Effect Level
PNEC = Predicted No-Effect Concentration
PROC = Process Category
PC = Product Category
ERC = Environmental Release Category

Key literature references and sources for data
Regulations, databases, literature, own research. Chemical Safety Report Hydrocarbons,
C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics, 2021.

Revision comments
Updated, sections: 1.4, 2.3, 11, 12.6, 14.7.

**Environmental release category**
- ERC1 Manufacture of the substance
- ERC4 Use of non-reactive processing aid at industrial site (no inclusion into or onto article)

### Worker

**Process category**
- PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions
- PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions
- PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition
- PROC4 Chemical production where opportunity for exposure arises
- PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities
- PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
- PROC15 Use as laboratory reagent

### 2. Conditions of use affecting exposure (Industrial - Environment 1)

**Control of environmental exposure**

No exposure assessment presented for the environment. The product components are not classified as environmentally hazardous.

### 2. Conditions of use affecting exposure (Workers - Health 1)

**Risk management measures**

- Avoid splashing.
- Avoid contact with contaminated tools and objects.
- Avoid contact with eyes and prolonged skin contact.
- Handle in accordance with good industrial hygiene and safety practice.
- Assumes a good basic standard of occupational hygiene is implemented.

If repeated and/or prolonged skin exposure to the substance is likely, then wear suitable gloves tested to EN374 and provide employee skin care programmes.

**Additional advice**

Do not ingest. If swallowed, then seek immediate medical assistance.

### 3. Exposure estimation (Health 1)

Qualitative approach used to conclude safe use.
Exposure scenario
Polymer Production - Industrial

Identification

Product name
Solvent, Heavy dearomatized - Category 8

Version number
N - 2021

1. Title of exposure scenario

Main title
Polymer Production - Industrial

Sector of use
SU8 Manufacture of bulk, large-scale chemicals (including petroleum products)
SU9 Manufacture of fine chemicals
SU10 Formulation [mixing] of preparations and/or re-packaging
SU11 Manufacture of rubber products
SU12 Manufacture of plastics products, including compounding and conversion
SU13 Manufacture of other non-metallic mineral products

Environment

Environmental release category
ERC4 Use of non-reactive processing aid at industrial site (no inclusion into or onto article)
ERC7 Use of functional fluid at industrial site

Worker

Process category
PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions
PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions
PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition
PROC4 Chemical production where opportunity for exposure arises
PROC5 Mixing or blending in batch processes
PROC6 Calendering operations.
PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities
PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
PROC9 Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
PROC14 Tabletting, compression, extrusion, pelletisation, granulation
PROC21 Low energy manipulation and handling of substances bound in/on materials or articles

2. Conditions of use affecting exposure (Industrial - Environment 1)

Control of environmental exposure
No exposure assessment presented for the environment. The product components are not classified as environmentally hazardous.

2. Conditions of use affecting exposure (Workers - Health 1)

Risk management measures
Polymer Production - Industrial

Avoid splashing.
Avoid contact with contaminated tools and objects.
Avoid contact with eyes and prolonged skin contact.
Handle in accordance with good industrial hygiene and safety practice.
Assumes a good basic standard of occupational hygiene is implemented.

If repeated and/or prolonged skin exposure to the substance is likely, then wear suitable gloves tested to EN374 and provide employee skin care programmes.

Additional advice
Do not ingest. If swallowed, then seek immediate medical assistance.

3. Exposure estimation (Health 1)

Qualitative approach used to conclude safe use.

### 2. Conditions of use affecting exposure (Industrial - Environment 1)

**Control of environmental exposure**

No exposure assessment presented for the environment. The product components are not classified as environmentally hazardous.

### 2. Conditions of use affecting exposure (Workers - Health 1)

**Risk management measures**

- Avoid splashing.
- Avoid contact with contaminated tools and objects.
- Avoid contact with eyes and prolonged skin contact.
- Handle in accordance with good industrial hygiene and safety practice.
- Assumes a good basic standard of occupational hygiene is implemented.
- If repeated and/or prolonged skin exposure to the substance is likely, then wear suitable gloves tested to EN374 and provide employee skin care programmes.

**Additional advice**

- Do not ingest. If swallowed, then seek immediate medical assistance.

### 3. Exposure estimation (Health 1)
Metalworking fluids - Professional

Qualitative approach used to conclude safe use.
